

B 47

Methyiated spirit mouth blow lamp complete with rubber tube and aluminium mouth-piece.
Plated finish.

Price 7/6 each

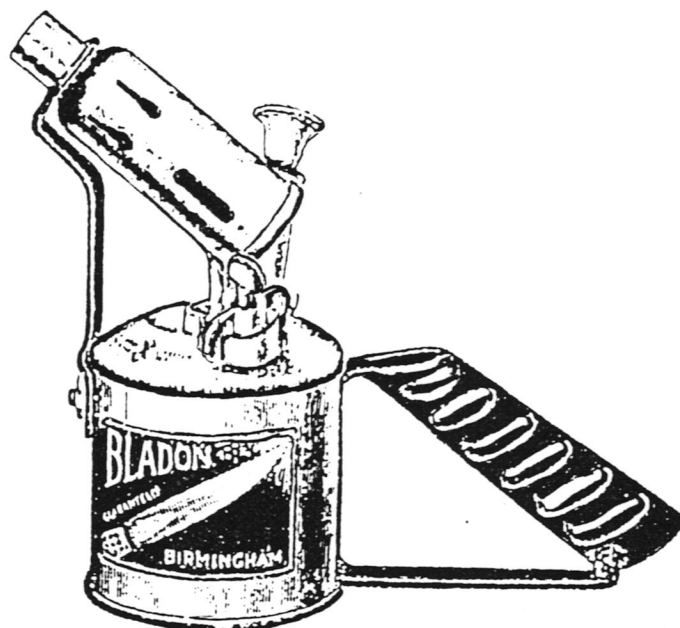

B 49

Small Methyiated Spirit Lamp with detachable nozzle and screw cap, easy to start, clean and safe, an ideal lamp for the amateur wireless expert.

This lamp was designed for and supplied to H.M. Admiralty for their electrical engineers.

Packed in strong box with necessary spares, cleaning needles, Case and instructions.

Price 5/6 each

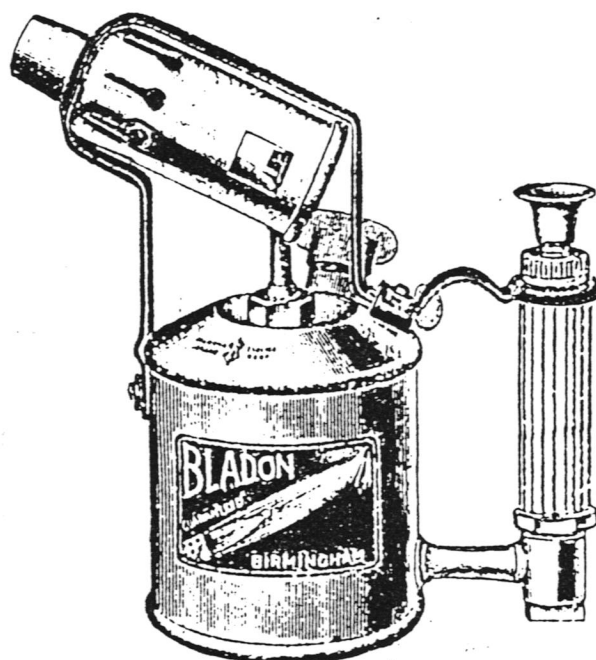

B 51

Small Paraffin Blow Lamp, $2\frac{2}{3}$ pint capacity, very efficient; we recommend this lamp to users who prefer Paraffin to Petrol, and whose work requires a small concentrated flame.

Complete with spare washers and cleaning needles, case and instructions.

Price 9/6 each.

B 57

1 pint all brass Paraffin Blow Lamp, improved tubular, vaporiser, brazed bottom, combined pump and handle. Very efficient, used by Cable Joiners and Electricity Departments. Complete with spare nipple pump washers, filler cap washers, nipple key and cleaning needles.

Price 22/6 each.

PARAFFIN SECTION

B 53

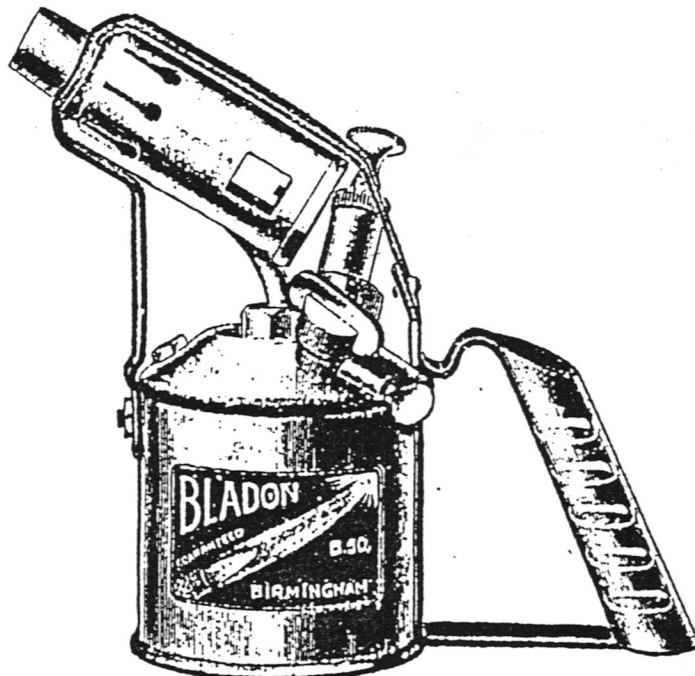

Price
12/6
each

B 53. 1 pint, all brass, paraffin Blow Lamp, all metal handle, improved tubular Vaporizer, automatic safety device, and new design pump, extra strong make, our first model, and one we are proud of, for straight-forward work it has no equal.

B 58

As B 53 but 2 pint capacity.

Price 15/9 each

B 50

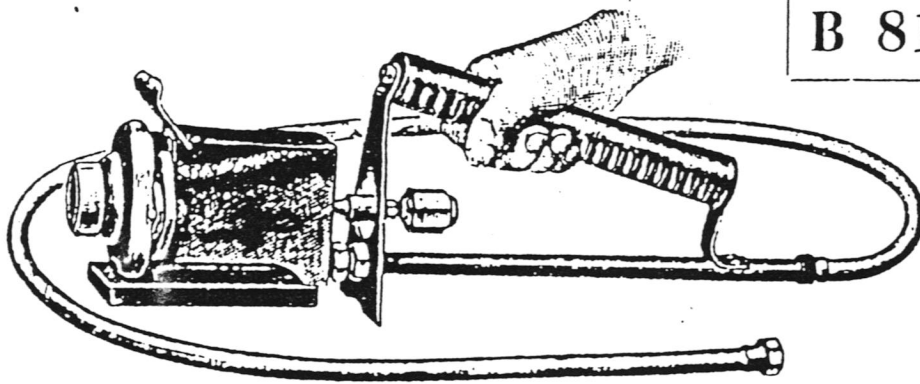

Price
11/-
each

B 50. 1 pint, light type Paraffin Blow Lamp, same fittings as B 53 but without automatic safety device.

Each of these lamps is supplied with set of cleaning needles and case, spare washers, both leather and cork.

PARAFFIN SECTION

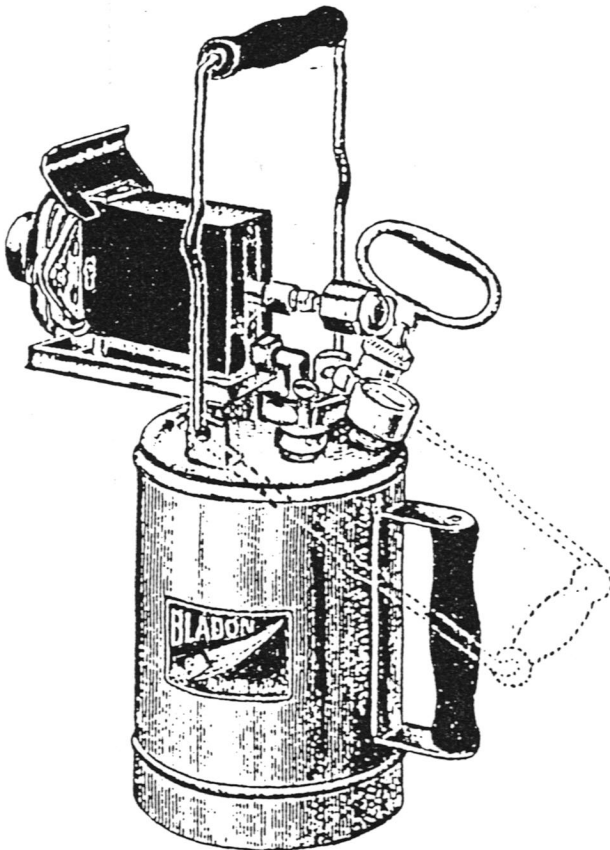

B 81

WITH EXTENSION.

(Registered design No. 718173)

A Brazing Lamp that we designed for the Air Ministry.

It is not—as all other makes—top heavy.

Can be used with or without Flexible Metallic Extension Tube.

Capacity is 6 pints, heat temperature $2,370^{\circ}$ F. Construction of lamp is very strong.

Reservoir heavy gauge brass, joints all brazed.

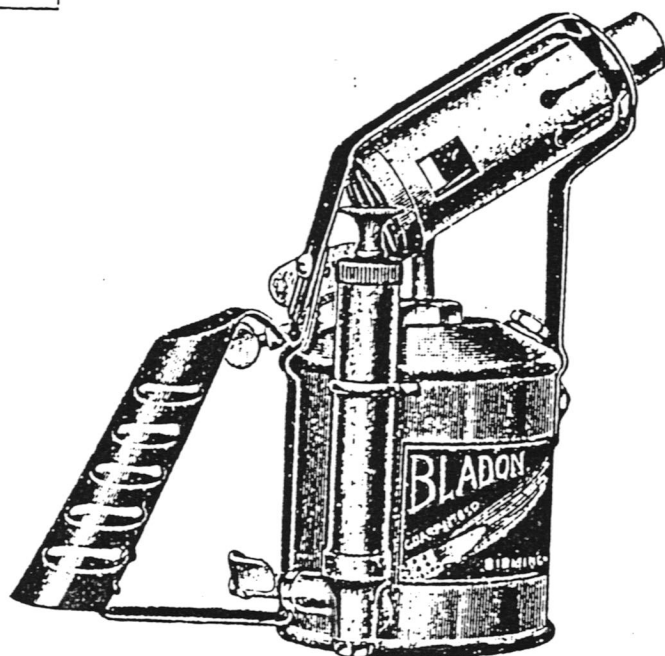

Price 52/6 each

Extra for extension and handle,
12/-

WITHOUT EXTENSION. Extra for pressure gauge, 4/-.

PARAFFIN SECTION

B 66

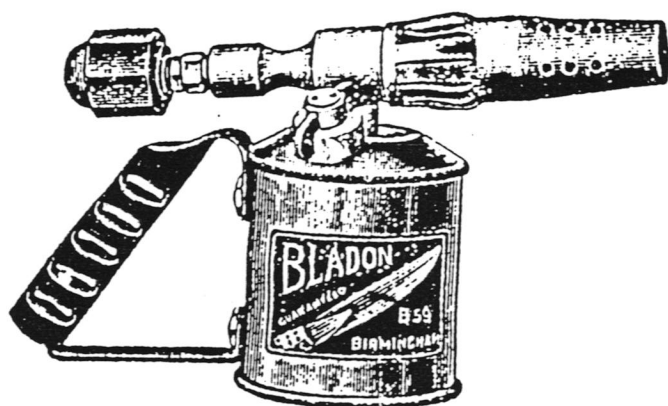

New Design Paraffin Lamp, tubular vaporizer, efficiency of flame same as Nos. B 50, B 57, B 53 and B 58. Container fitted with automatic safety device—Pump, our Patent No. 338776-29. Possesses special non-return valve operated by thumb, and controlled by coil spring. Prevents leakage of pressure or fuel. Enables lamp to be left alight and unattended without risk of fire.

This Lamp has been accepted by H.M. Admiralty.

Complete with necessary Spares, Instructions, etc.

Price 15/- each

PETROL AND BENZOLINE SECTION

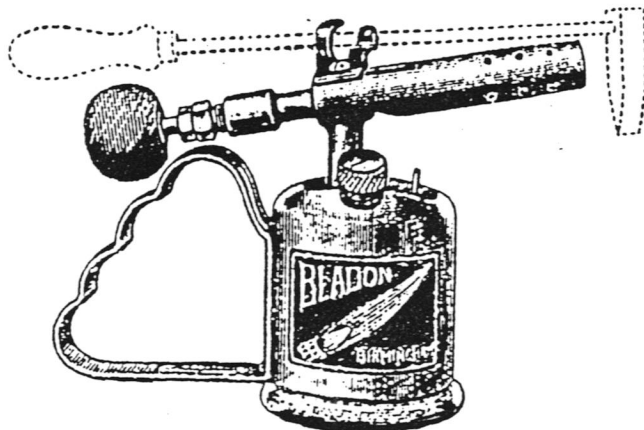

B 59

½ pint Petrol Blow Lamp, efficiency and flame same as B 61, all metal handle attached by screws, hurricane nozzle, self cleaning nipple, automatic safety valve incorporated in filler cap, exceptional value, which is not equalled, invaluable as part of tool outfit for repair mechanics.

Small, light in weight, but a fast worker.

Price 9/- each

B 46

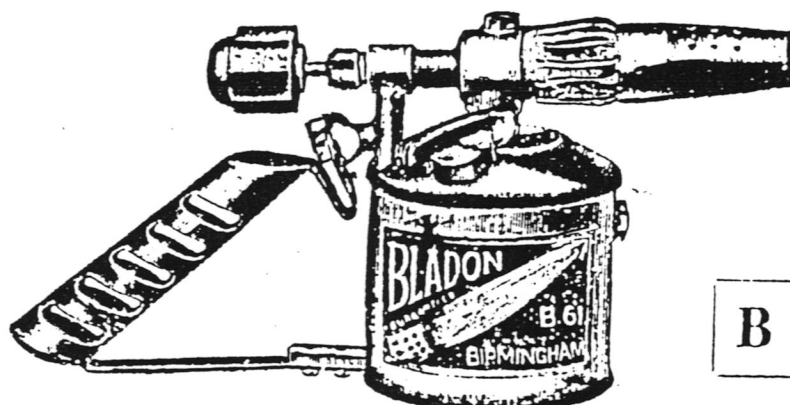

New design ½-pint Petrol Blow Lamp. Useful tool for all Amateurs, Electrical and Wireless workers. Gives a pointed flame 3 ins. long, fitted with bracket to take small soldering iron. Control valve carries nipple-cleaning needle. Australian Post Office Engineers have recently taken 700 of these Lamps for cable jointers.

TESTED AND GUARANTEED.

Price 5/6 each

Complete with Instructions and necessary Spares.

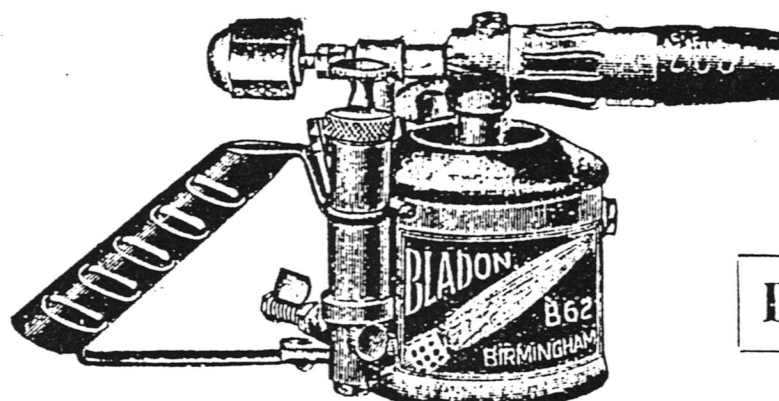

PETROL AND BENZOLINE SECTION

B 61

Price 12/6 each

Latest type Petrol torch — all metal insulated handle — Hurricane nozzle—self-cleaning nipple—automatic safety valve—capacity $2\frac{1}{3}$ pint handle attached by screws, not soft soldered. This model is adopted as standard by G.P.O. Engineers and we have again been favoured with their contract.

B 62

(Patent No. 238776-29)

Price 17/6 each

Same make, size, etc., as B 61, but fitted with pressure pump and patent automatic non-return valve.

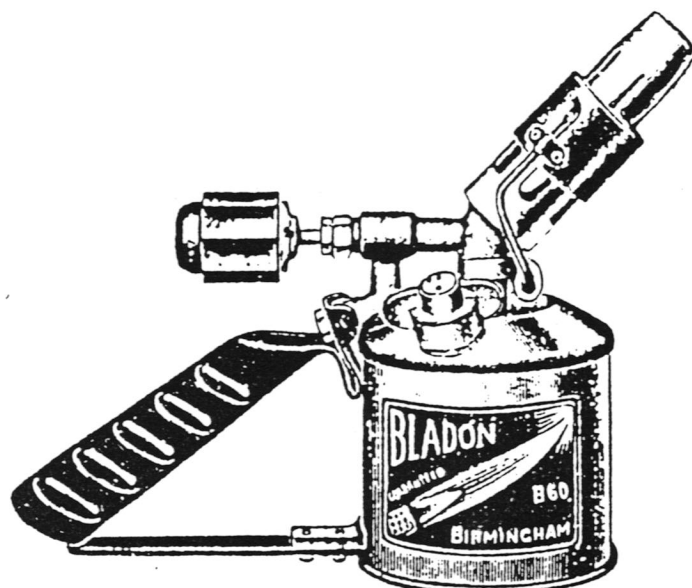

This lamp was asked for by our clients and fills a long-felt want, particularly when work has to be done in exposed positions.

B 63

As B 62 but 1 pint capacity.

Price 20/- each

PETROL AND BENZOLINE SECTION

B 60

Inclined

This Model competes in price with the best known foreign makes, but is better value; we have added refinements, made it stronger, and IT IS SAFE.

The combined filler screw and safety valve has been adopted by the Post Office Engineers and is fitted to all the old type lamps that are still in commission (we have supplied many thousands).

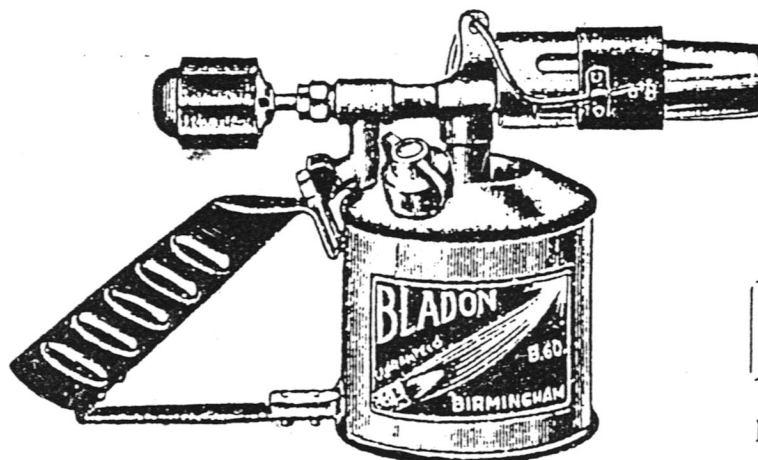

Where first cost is of great importance, or lamps are likely to be abused by careless users, we recommend this model.

It is not self-cleaning, but otherwise it is as Efficient as the B 61 and B 62.

It is made with flame tube either inclined or horizontal and supplied with three cleaning needles and spare cork washers.

We claim that it will do better work than any other similar make of lamp.

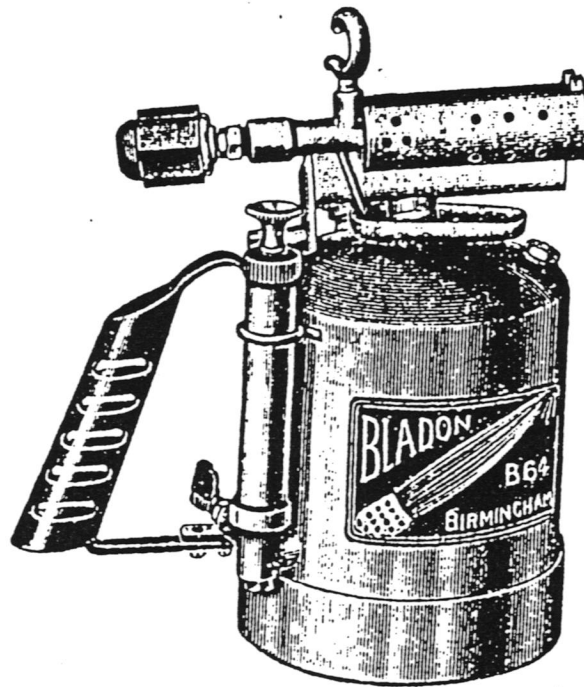

Price 10/6 each

B 60

Horizontal

PETROL AND BENZOLINE SECTION

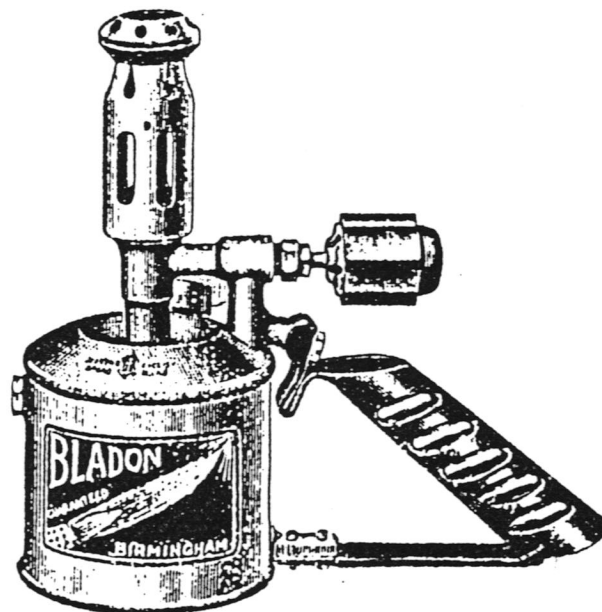

B 64

Price
37/6
each

(Patent No.
338776--29)

2 Pint Petrol Blow Lamp, powerful flame, recommended by Electricians and Engineers for heavy work, cable fitting, etc. Self-cleaning nipple, all metal insulated handle, pressure pump fitted with patent non-return valve, reservoir heavy gauge brass, all joints brazed. This lamp was accepted by Royal Dockyard Engineers after severe test.

B 65

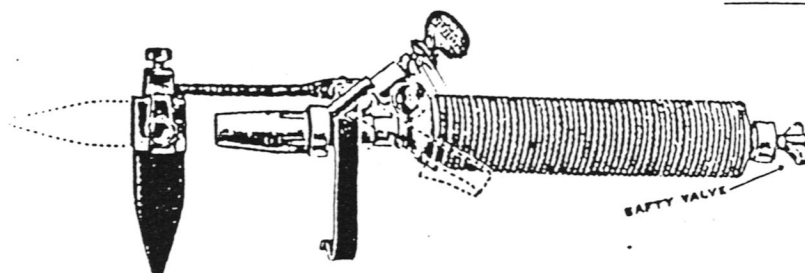

Price
15/9
each

All brass Petrol Blow Lamp with specially constructed nozzle. Very useful for laboratory use, dentists, mechanics, etc. Gives a perfect bunsen flame, fitted with automatic safety device and complete with necessary spares and instructions for use.

PETROL AND BENZOLINE SECTION

COMBINED SOLDERING IRON AND BLOW LAMP.

B 75

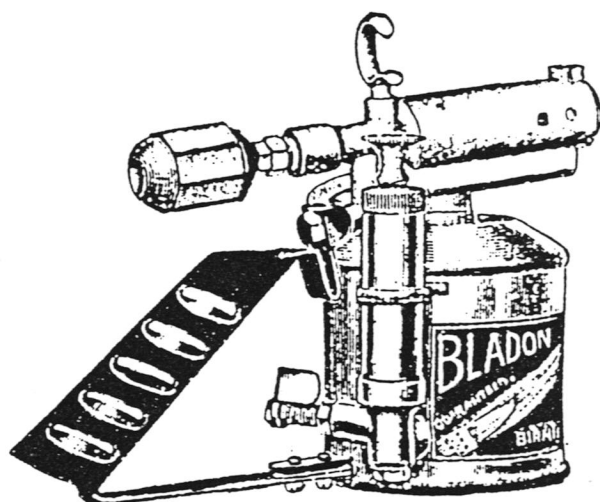

A very handy and useful tool.

Burns Petrol or Benzoline, body covered with asbestos, string wound, automatic safety valve in filler screw, Nothing novel—just plain John Bull—reliable.

Complete with Cleaning Needles, Washers, etc.

Price 22/6 each

(Patent No. 338776-29)

B 48

Price
21/-
each

Can be supplied 1 pint size.

Price 22/6.

This lamp is a small furnace, which thrives on cold. Was designed for use on the Forth Bridge, and proved a great success. The petrol consumption is a little higher than models B61 and B62, but for work outside in exposed positions it will save its cost in a very short time. 2/3 pint capacity, self-cleaning nipple, all metal insulated handle, pressure pump fitted with patent non-return valve.
